- Responsive Web Design
- Problem-solving and Debugging
- Version Control (Git)

Profile

As a dedicated and motivated fresher web developer, I bring a strong foundation in web technologies, including HTML, CSS, Bootstrap, JavaScript, WordPress, MySQL, PHP, Laravel, and React.js. I am eager to leverage my skills and knowledge to contribute to dynamic web projects and continue to learn and grow in the field of web development.

Work Experience/Projects:

○ Hospital Management System

Collaborated on a team project to create a Hospital Management System web application using HTML, CSS, Bootstrap, JavaScript, MySQL and PHP.that streamlines the day-to-day operations of healthcare facilities. This system enables efficient patient management, appointment scheduling, billing and invoicing.

○ Bus online ticketing system

I have developed an Online Bus Ticketing System web application using HTML, CSS, Bootstrap, JavaScript, MySQL, PHP, and React.js .which convenient and user-friendly platform for travelers to book bus tickets online. This system allows users to search for bus routes, view schedules. It offers secure payment processing and generates electronic tickets for passengers. Additionally, it includes features for seat selection, ticket cancellation, and real-time updates on bus availability. making it simpler and more efficient for both travelers and bus operators.

○ E-Commerce

I've created a responsive e-commerce web app using HTML, CSS, Bootstrap, JavaScript, and PHP. It enables users to shop online, manage their carts, and make secure payments. With user-friendly features, it provides a seamless shopping experience for customers.

○ Inventory Management System

I designed a robust inventory management web application using HTML, CSS, Bootstrap, JavaScript, and PHP. This system allows users to efficiently track and manage their stock levels.
